

MICRO SWITCH™ GKN Series Key-Operated Safety Switch Product Nomenclature

For example, a **GKNA21** part number would define a GKN Series key-operated safety interlock, 1/2 in NPT conduit, and 2NC/1NO break-before-make circuitry. A GKZ42 key actuator would define a 90° key.

NOTE: not all combinations of model code are available.
Please contact your Honeywell provider/representative for assistance.

* A key actuator (ordered separately) is required for each switch.

*Keys Listing	Key style
GKZ41	Straight
GKZ42	90°
GKZ45	Multi-directional
GKZF1	Funnel
